

LEGACY

LOW MAINTENANCE BATTERY

The Legacy Low Maintenance Battery delivers the power and cycle life associated with a standard flooded battery with lower maintenance costs.

Our proprietary hybrid grid alloys allow extended watering intervals up to 90 days apart. Our new separators and new internal construction reduce gassing associated with water loss.

The Legacy Low Maintenance battery uses match set charging, which is the same as our High Performance Battery, with no special requirements. Douglas Battery engineered the Legacy Low Maintenance Battery without compromising the internal structure of the cell.

Compared to a standard flooded battery, the Legacy Low Maintenance battery increases your efficiencies with less water intervals and fewer problems.

Douglas Battery did not just increase water heights by sacrificing sediment space. The Legacy Low Maintenance battery features a new internal design, that takes advantage of optimized grid metallurgy and new technology, to give true Low Maintenance performance and unquestionable quality.

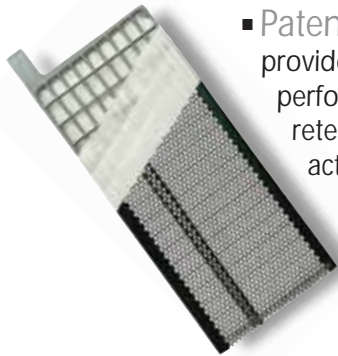

DOUGLAS LEGACY™
LOW MAINTENANCE BATTERY

LEGACY LOW MAINTENANCE

LEGACY LOW MAINTENANCE BATTERY

The Legacy Low Maintenance Battery, working in the normal operations of day to day services, will provide less watering frequency but should not exceed a 90-day watering interval. Due to varied use, operations and battery age, battery water intervals will vary.

- Patented plate design provides reliable performance through retention of active material.

- Flip top vent caps reduce labor when it is time to "top off".

- Quick - Connect Cables make cable replacement quick and easy.

- A full capacity Low Maintenance battery offered in the 85, 100 and 125 AH for more than a light duty application.

- Hand wrapped positive plates personally reassures pride and quality.

- Special lead alloy with the addition of a unique formulated separator reduces gassing during the charging cycle.

- Less gassing means less watering, reducing maintenance time.

- Douglas Toughcoat® on trays - withstands corrosion and is designed for the toughest conditions.

- 5-Year Limited Warranty.
